## MUSEUM EXHIBIT

### CSI: THE EXPERIENCE

#### CSI: The Experience

Fort Worth Museum of Science and History

Design Island had the vision to see that a great tv show could be combined with great learning to create a fabulous touring exhibit. DI approached the producers of CSI and the Fort Worth Museum of Science and History to put together a partnership. After seven months of hard negotiations, DI secured a deal with CSI producers, CBS, and the Museum to create CSI: The Experience.

Recreating all the excitement, thrills, and discovery of the popular CBS TV franchise, this 6,000 sq. ft. interactive experience creates a virtual autopsy in which guests are able to experience and understand the mechanics and science of an actual autopsy. A series of interactive videos invite guests to examine different types of evidence, submit their findings, and get feedback from the CSI Supervisor. Video inserts of the CSI TV stars are incorporated throughout.

#### AWARDS

THEA – Traveling Exhibit, Limited Budget

#### CLIENTS

Van Romans, President  
Fort Worth Museum of Science and History
